Response to Amendment

The after-final amendment is entered under 37 CFR 1.116 as it expressly complies with the form of the previous office action.

Allowable Subject Matter

Claims 1-30 are allowed.

The following is an examiner's statement of reasons for allowance: Hendel was relied upon to replace VLAN information and forward the packet to the next hop and to notify the external ports that will forward the packets outside the MLDNE of a need to route the packet by setting the first control signal (sa.sub.-- replace bit) to indicate to the forwarding external ports that the Layer 2 source address of the packet to be forwarded must be replaced with the source address of the external port. Kanuri et al. was found to disclose a layer 3 switching logic architecture which enables a router to be bypassed by replacing the MAC address (specifying the router), equated as the next hop, with the destination IP address of the node.

A thorough review of the prior art fails to disclose or render obvious "wherein said changing of said first identifier within said header portion comprises overwriting within said header portion of said modified at least one packet, said first identifier with said third identifier located within said modified at least one packet, by using said common switch" when viewed in context of the rest of the claim language that the first identifier is the common switch and the third identifier is the second blade server, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
